12V DC UPS
with LiFePO

Overview

The CellInfra's CTSUPS-24W-A UPS is a compact, high-efficiency DC backup power solution that meets modern energy standards. It provides a single 12VDC output with automatic changeover to an integrated 6000mAh LiFePO4 battery during power interruptions. The unit features a standard jack plug connector and LED status indicators, making it suitable for industrial and embedded systems requiring reliable uninterrupted DC power.

What Sets It Apart

- **Universal AC Input:** 80–300VAC
- **Output:** 12V / Max 24W
- **Battery:** LiFePO 6.4V / 6000mAh
- **Protection:** Short Circuit, Over Current & Over Temperature

- **Surge Immunity:** 6kV
- **Energy Efficiency:** Level VI
- **Warranty:** 1-Year Replacement
- FR Grade ABS, with IP31 Enclosure

OUTLAST EVERY OUTAGE.
